

HCR-185ES Hedge Cutter

NO BUMPING OR SNAGGING
A newly-designed rear handle means the frame base is located higher than the blade. This means the HCR-185ES runs smoothly across hedges without bumping and snagging.

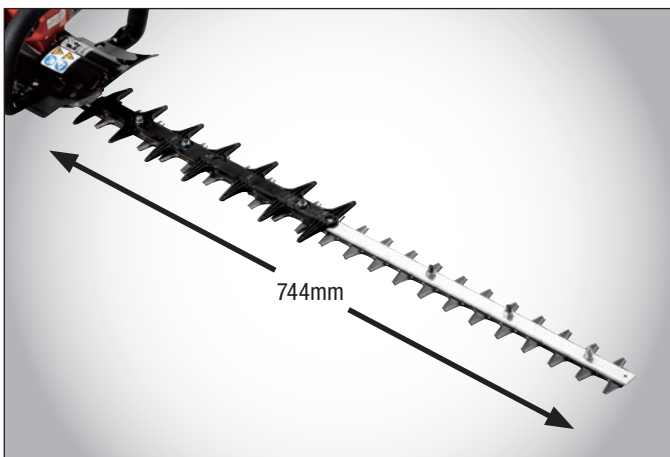

ECHO's HCR-185ES is a 21.2cc twin blade hedge cutter. It features laser cut, double reciprocating blades for long lasting sharpness and has an effective cutting length of 744mm.

The 5-position rotating handle allows the operator to use the machine at different angles without having to twist the whole hedge cutter.

The superior exhaust system protects both the user and the hedge – the all-enclosing cover prevents anyone touching the hot exhaust. At the same time, the directional exhaust not only keeps emissions away from the user, but also the hedge, preventing scorching and discolouration of the foliage.

The HCR-185ES features a 5-position, rotating handle for manoeuvrability and comfort

SPECIFICATIONS

Displacement	21.2cc
Dry weight	5.3kg
Output	0.57kW
Effective cutter length	744mm
Pitch	35mm
Blade layout	Double
Cutter clearance	Adjustable
Fuel tank capacity	0.37 litres
Start assist system	Easy Start
