Indications

Cascomic is indicated for the generation, growth, maintenance and regeneration of hooves, hair, and horsehair tail. Its balanced formulation provides all the essential elements for an optimal integrity, guaranteeing structural and nutritional support for keratin production, collagen formation, tissue elasticity, permeability, flexibility, etc.

Target species

Equines, mules and donkeys.

Route of administration

Oral, mixed with food.

Dosage

Equine, mules and donkeys adults: maintenance dose 15 g, treatment 30 g daily.

Young animals, foals, ponies: maintenance dose 10 g, treatment 15 g daily.

The dosage, frequency of administration and duration of treatment may be modified according to the discretion of the veterinarian for each case. If the dose is increased to more than 30 g daily; it is advisable to provide it twice every day.

Precautions

Keep out of the reach of children and pets.

Never reuse empty containers, once used, destroy remainder and container safely, according to the national regulations force for veterinary products.

Store in dry cool place, protected from direct sunlight.

Presentations

500 grs and 1 kg.
